

# ROULETTE

## How To Play

The roulette wheel is marked with numbers 1 through 36 and numbers 0 and 00. Numbers are alternately colored red and black, while the 0 and 00 are green. Odds on roulette range from 35-to-1 to even money and are determined by the types of bets wagered on by the player.

To play, insert cash or a voucher into bill acceptor. Place your bets by selecting the desired bet denomination from the chip set and either touch any bet position on the field or drag the chip to bet position. When the system announces, **"No more bets, thank you"** you cannot place any further wagers. For more play or game information, press the **"Help"** button on the screen.

# Golden Ball Mystery

## Side bet

A **Golden Ball Mystery** bet wins, if the roulette ball lands on one of six randomly selected roulette numbers represented by the letters G, O, L, D, E and N.

To place a bet, select the desired betting chip and press inside the betting location indicated with the **BET HERE** sign.

The side bet must be placed before the timer runs out. The remaining betting time is shown around the side bet betting field. As the side bet timer runs out, the wager is locked and cannot be changed or removed.

Immediately after either ball is launched, six roulette numbers are generated, one for each letter. One of the numbers is also randomly selected as a bonus number with higher payout. The selected bonus number is highlighted.

If you win, you are paid according to the payout displayed under the winning number.

Payouts of the winning Golden Ball Mystery numbers are different depending on whether white or golden ball is launched on the roulette wheel.
